Wheeled Hydraulic Excavator Specifications

MHplus

Service weight 14.8 t – 16.8 t
Engine output 78 kW
Bucket capacities

0.28 - 1.05 m³ (SAE)

- PMS three-pump hydraulics
- Electronic control and monitoring system
- Deluxe cab with noise suppression
- Highly fuel efficient
- Outstanding stability
- Ample lift capacities

CE symbol according to EC Machinery Directive. TÜV certificate for compliance with DIN ISO EN 9001. Lifting gear operation permitted with anti-burst and overload warning devices installed.

Ultramodern cab in softline design with ample space for the operator

Variable-speed drive motor with automatic tractive force adjustment

Comfortable multi-disc transmission, gear-shifting under partial loads

Perfect engine and pump management system PMS III

PMS III manages engine and pump performance to unbeatable levels of comfort and efficiency. All the important functions are monitored in order to reduce downtime and extend durability. Ongoing comparison of stored target data (e.g., temperature) with actual values provides automatic adjustment of engine and pump performance in the event

of any deviations. The engine is never overworked! The diagnosis system makes any malfunctions visible and thus simplifies service.

functions are initiated with maximum sensitivity and virtually no losses. The outcome: lower oil temperatures, extended uptime for all components and appreciable fuel

Electronic immobilizer prevents theft A standard feature on all O&K excavators is an electronic immobilizer which makes sure that the engine will only start up once a code has been entered. The immobilizing function is overridden by pressing the control panel keys. During working hours the immobilizer can be disconnected and then reactivated after hours, thus preventing theft, of increasing occurrence on construction sites. **Smart technology lowers operating costs** Power under control; O&K has many examples to illustrate this: alongside variable flow, prioritized ECO output level and rev-lowering under zero-load conditions. Plus the closed swing circuit preventing unnecessary hydraulic heatbuildup when swinging or braking the superstructure. Hence, less need to cool and less fuel consumption. Variable control ensures precise control High-precision volume control meters exactly the right amount of oil flow for any particular function. Attachment

savings.

The plus in comfort: a performance-enhancing cockpit

The ultramodern cab on the MHplus has ample space for the operator plus stowage area behind the seat. The rounded tinted windows of the futuristic softline design prevent glare. The structure of the frame parts and large roof window improve upward visibility substantially. The front pane slides easily under the roof (a standard feature) where it locks safely into place. The lower part can be titled for optimum cab ventilation.

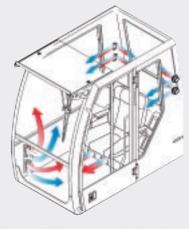

The doors have sliding windows as standard. The front roof projection in tinted Lexan glass keeps out the rain with the front window open while a standard sunshade prevents rays entering from the front and top.

The bright and stimulating colors and stylish design combine to create an agreeable working ambience. All the controls are designed and positioned according to the latest ergonomic findings. The servo-controlled levers with short throw and integrated buttons for additional functions, are conveniently positioned in the individually adjustable side consoles. Additional assets: the comfortable adjustable swing seat, the low noise level, and an extra-throughout ventilator providing slight overpressure within the cab.

Fits snugly behind the operator's seat: the O&K cool box (optional).

The air conditioning system (optional) uses an ingenious airflow system to ensure agreeable temperatures at all times.

Comfortable multi-disc transmission, gear-shifting under partial loads

A multi-disc transmission makes O&K wheeled excavators even faster, with less work for the operator. The transmission shifts under part loads, i.e. gear changes are more comfortable and quicker.

Outstanding ground clearance

As the transmission is directly flanged to the rear axle, the MHplus has an outstanding ground clearance. The steering cylinders are safeguarded against damage in the axle housing.

Patented multi-disc brake for almost jolt-free working

Conventional systems transfer planetary gear backlash, causing a frequent see-sawing movement of the excavator. This is avoided with O&K's patented technology. Braking force is directly transferred to the brake, the excavator staying almost jolt-free. The hydraulically operated oil brake is a completely sealed system and delivers full braking action even under the most punishing conditions (in water). In contrast to pneumatic systems, there is no risk of condensing water, freezing in winter and frequently impairing braking response.

Rugged frame weldment

The rugged torsionally stiff frame is of box design and robot welded for absolute precision and a long service life.

Powerful engine - fuel-efficient

The powerful water-cooled Deutz engine is efficient and kind to the environment. With its exceptional efficiency, the electronic Pump Managing System PMS III translates this power into ample hydraulic performance.

"Drive" function standard for more power on terrain

With its standard drive function, this O&K unit has power to spare on rough terrain and easily negotiates steep grades when using the creep function. The variable-speed drive motor automatically adjusts travel speed and hence reduces the need for gear shifting.

Maintenance and back to work in no time at all

Excellent accessibility to the engine and all components shortens maintenance time and boosts productivity. All service items are quickly and easily accessible. Daily maintenance can be performed from ground level. Work is done in no time at all. Long-term lubricated components such as the fully encapsulated ball-bearing swing ring extend maintenance intervals.

The neatly laid-out central display indicates to the operator any necessary checks and maintenance jobs. Additionally, the O&K diagnosis system records any engine and/or hydraulic malfunctions, thus acting as an early warning system before any damage occurs.

Engine

Deutz diesel engine

BF4 M 1012C

Water-cooled • Exhaust-gas turbocharger with charge-air cooler • Integrated cooling system for lube oil and coolant • Dry air filter with safety element and contamination indicator • Electric rev adjustment • Electric engine stop at key switch

Engine output ISO 9249	78 kW / 2300 RPM
Governed engine output	74 kW
Cylinders / displacement	4 / 3200 cm ³
Bore / stroke	94 mm / 115 mm
Voltage	24 V
2 batteries	each 12 V / 92 Ah
Alternator	28 V / 35 A
Starter	4 kW / 24 V

Exhaust gas emission values according to EC directive

Hydraulics

PMS 3-pump system with two main pumps and a separate swing pump • Main pumps each with individual control • Double flow • Parallel bucket circuits for 4 functions simultaneously • Microfiltration of return oil, servo and swing circuits • Flow on demand • Hydraulic cooler with hydrostatic fan drive

Maximum delivery main pumps	2 x 126 l/min
Maximum delivery swing pump	64 I/min
Maximum pressure without booster	320 bar
Maximum pressure with booster	360 bar
Maximum pressure, swing gear	390 bar

Control and monitoring system

Engine and pump monitoring system with electronic load limit (PMS III) • Controlled heat-up phase • Engine and hydraulic system temperature monitoring, with rev limit to protect engine and pumps • Automatic rev return

4 output levels:

	Drive	Heavy	Eco	Lift
RPM	2300	2200	2000	1800
Pump output	-	100 %	90 %	65 %

Swing gear

Swing pump/motor within sealed circuit for zero-loss superstructure start-up and braking • Swing gear with built-in wear-proof multi-disc brake • Encapsulated ball-bearing swing ring with lifetime lubrication

Effective slewing moment	35 kNm
Max. rpm	9.1

Cak

Tinted safety glass • Front top pane retracts, lower part removable • Sliding windows in the doors • Roof window • Rain-protection roof • Three-speed blower • Defroster nozzles for leg area and front windows • Central display for all control and monitoring functions • Deluxe seat • Control functions to SAE recommendations • Individually adjustable side consoles • Ergonomic servocontrol levers

Drive

Hydraulic all-wheel variable-speed drive • "Drive" function • Tractive forces adjusted automatically • Planetary excavator axle with integrated, directly-acting multi-disc brakes • Steering cylinder integrated within the axle • Transmission flanged to axle

Max. effective tractive	force		85 kN
Max. travel speed			
	Terrain	low gear:	6.0 km/h
	Road	high gear:	20 km/h
Creep speed			
		low gear:	2.5 km/h
		high gear:	9.0 km/h
Standard tyres (8)			10.00-20

Capacities

Fuel tank	250 I
Cooling system	10.0
Engine oil incl. filter*	11.5 I
Slewing gear*	3.50 I
Hydraulic tank*	170 I
Hydraulic system	250 I

^{*} for oil change

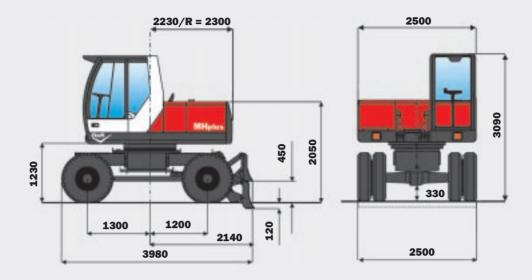

Equipment

Low maintenance through hardened and corrosion-proofed bearing pins, low-wear bushings, sealed bearings and easily accessible grease distributor for boom • Hydraulic cylinders with articulated bearings • Progressive end-of-stroke dampening • Spotlight mounted on boom

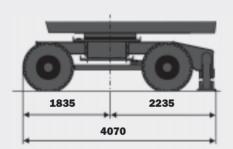

Options

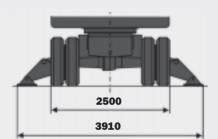

A/C • Eco-friendly hydraulic oil • Auxiliary heating • Anti-burst and overload warning devices • Pressure booster with power boost operation • Spacers • Cassette/radio or prepared for radio/cassette • Additional headlamp • Electric refuelling • Special tyres • Stone guard • Grab swivel device • Comfort package
